Environmental Resource Permitting (ERP) and Sovereign Submerged Lands (SSL) Rules

Statewide Stormwater Treatment Rule Development

To address growing concerns about over-enrichment of Florida's surface waters, ground waters, and springs by nutrients, the Department and the Water Management Districts are developing a statewide stormwater treatment rule. This rule represents a significant step forward in the control of nutrient loadings from stormwater discharges.

A [Technical Advisory Committee](#) has been established to assist the Department and Water Management Districts in developing this rule. We will be using this web site and a mailing list to distribute information about the development of the stormwater rule and keep the public informed.

Rule Development Schedule - Revised December 2008

TAC meetings March – November 2008

Develop revised Applicant's Handbook - December 2008 - February 2009

TAC meetings - March - June 2009

Rule workshops - September 2009 - February 2010

Rule adoption - May 2010

Rule effective - July 1, 2010
